Art Unit: 2833

Claims 1, 5, 21, 28 and 31 are objected to because of the following informalities: in claim 1, line 10, "so that" should apparently be -- wherein --. In claim 5, line 1, -- the -- should be inserted after "wherein". Claim 21 should depend from claim 20 due to the recitation of the receptacle strip. Claims 28 and 31 should depend from claim 26 due to the recitation of the first portion and the second portion. For purposes of examination these claim dependency changes have been deemed to have been made. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-17, 22-25, 29 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor 5277620.

Disclosed (Figure 7) are elongated body 12, receptacles (outlets) 30,32, U-shaped line management device (utility line holder) 70, and stand (support structure) 56. The two parallel arms of 70 could be considered the first and second line management devices of claim 16. The opening defined by 58,60,62 could be the opening of claim 17.

Claims 1-14 are allowed.

Claims 18-21, 26-28 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2833

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly Taylor, discloses or teaches a utility connection station having 1) a retractable U-shaped line management device, 2) a stand having first and second retractable arms, 3) a receptacle strip movable from a stowed internal position.

The other references cited on Form 892 disclose multiple-receptacle connectors and/or wire management devices.
